If you are using Notepad select "word-wrap" from the "edit" menu for better viewing.

Polaroid has added support for nine (9) new film tables for the ProPalette 7000 bringing the total number of films we support for the ProPalette 7000 to eighteen (18). Additionally we have renamed three of the previously existing film tables for clarity. The new and renamed film tables are listed directly below. A complete listing of all film tables available for the ProPalette 7000 is at the end of this document.

See the "Film Table Installation" section below for installation instructions.

New films:

Kodak	Type	Film Table Name
Kodak Gold 100-6 v7c	35mm Color Negative	KG6-1007.FLM
Vericolor III v7c	35mm Color Negative	VPS160_7.FLM

Konica	Type	Film Table Name
Konica 100 Neg v7c	35mm Color Negative	KNCANEG7.FLM
Konica JX100 Neg	35mm Color Negative	KONJX107.FLM
Konica R-100[KS] v7c	35mm E6 Color Slide	KONR1007.FLM

Fuji	Type	Film Table Name
Fuji Provia RDPII 100	35mm E6 Color Slide	PROVIA_7.FLM
Fuji Sensia II RA 100	35mm E6 Color Slide	SENS2RA7.FLM
Fujichrome Astia RAP	35mm E6 Color Slide	F_ASTIA7.flm

Renamed Films:

Kodak Dyna EX100 v7c	was	Dyna II 100 v7c	DYNA_EX7.FLM
HC Polachrome v7c	was	HC Polachrome	HCPOLA_7.FLM
Fuji Sensia [RDII] v7c	was	Fuji Sensia RDII v7c	SENSRD27.FLM

===
FILM TABLES INSTALLATION:
===
Windows 95/NT installation

A complete library of the films available for the ProPalette 7000 and this file are contained in the self extracting compressed file PRO7FLMS.EXE. Double click PRO7FLMS.EXE to extract and follow the instructions below.

Step1 - Polaroid's "Digital Palette for Windows" software installs the film tables and associated files in a directory on your hard disk. If the default installation was used, the directory will be C:\DPPR7000. If you would like to save your old film tables do the following:
  a - Create a "OLD" directory in the DPPR7000 directory to store the old tables.
  b - Copy all of the old *.flm and *.txt files into the newly created "OLD" directory.

Step2 - Delete the *.flm and *.txt files from the "DPPR7000" directory. DO NOT delete the other files in the "DPPR7000" directory such as the "DPALETTE.INI" and "GRAYCARD.TIF" files.

Step3 - Copy all of the new .FLM and .TXT files from PRO7FLMS.EXE into the new directory. The new film tables will be available to Palette Export Photoshop plugin and RasterPlus95 for "QUEUE" printing but not "File Printing" from within an application.

Enabling RasterPlus95 to use the new film tables for "File/Printing"
The film names are stored as part of the Microsoft W95/NT printer driver. To make the new films available, the printer must be deleted from the "Printers" dialog box.

Step1 - Go to "Start", "Settings", and "Printers". Right click the
        Pro7000 icon and select "delete".
Step2 - Run RasterPlus95, go the "Tools", "Global Properties",
        select the "ProPalette 7000" and install. The
        ProPalette 7000 printer icon will be reinstalled
        with all the new film tables.
